

# Pilgrim Icon Program Reporting Information

There will not be a log sheet used this year to track and report your council's participation in the Pilgrim Icon Program; instead each Icon will have a tag with a QR code on it that will take you to the online #10784 form.

## **Reporting**

Please encourage councils to report their participation in the program through the online [Fraternal Programs Report Form](#) (#10784). There will be no paper log forms.

The QR code on each icon tag is linked to the online #10784. A member hosting the icon can hover over the QR code with his phone's camera and click on the link that appears. Then, after entering his last name and member number, he can enter data into the #10784 form. This will only work on iPhone's and certain Android devices.

We will use the data reported to help determine how many icons a jurisdiction will receive in the next icon program. Reporting is also very important as we use these reports to track how many people we reach through the icon program. Since the first icon in 1979, we've reached more than 22 million people through close to 175,000 prayer services.
